Oracle Next Education.
Oracle, Alura.
08/2022 - 02/2023.

LANGUAGES

Inglés - C2 Proficent (74/100)
Spanish - Native speaker.

PROJECTS

Portfolio
A dynamic and user-friendly single-page application built using React.
I've used TypeScript to ensure my code was clear. The design of the site was created using pure CSS, with animations implemented using Framer Motion. Navigation was made seamless and intuitive through the use of React Router v6, making it easy for visitors to access information about my education, past projects, and overall professional growth.
